MANUEL CANTU

PROFESSIONAL COORDINATOR

Fleet Maintenance & Operations · Technology Driven · Detroit Certified Technician

Papillion, NE 68046 · Open to relocation | 402-514-7866 | manuelcantu55@yahoo.com | github.com/CANMAN555

01 PROFILE

I keep repairs moving. As a fleet repair coordinator and a former service manager, I handle a lot of repairs at once, decide what comes first based on safety and getting trucks back on the road, keep costs in check, and keep everyone in the loop until the job is done. I spent years as a factory-certified diesel mechanic, so I know the work I'm coordinating. I'm also good with technology: I planned and launched a free website that helps drivers and dispatchers find truck repair shops, built with AI tools and GitHub. I speak English and Spanish.

12
technicians led as Service Manager

~200
semi trucks kept on schedule

135
snow units calibrated in 2 months

3,600+
truck shops on my website

02 CORE SKILLS

COORDINATION

Project coordination · Scheduling · Dispatching repairs · Vendor management · Prioritization · Cost control · DOT compliance · Documentation

LEADERSHIP

Team leadership · Training & mentoring · Quality control · Customer service · Sales goals · Inventory control

TECHNICAL

Diesel diagnostics · Electrical & wiring diagrams · Hydraulics · Air brakes · Preventive maintenance · Fabrication & welding

TECHNOLOGY

AI Trainer · Claude · ChatGPT · Gemini · Copilot · Grok · Building websites with AI · Python · SQL · HTML / CSS / JavaScript · GitHub · GitHub Pages · Supabase · Online maps · Microsoft Office

03 EXPERIENCE

Fleet Repair Coordinator

June 2026 – Present

H&M Trucking · Omaha, NE

- Set up maintenance, repairs, and roadside service for a large fleet of trucks and trailers, and schedule the work to keep downtime low.
- Keep drivers, mechanics, dealerships, and vendors on the same page, and update drivers and operations from the breakdown until the truck is back on the road.
- Handle several breakdowns at the same time and decide what gets fixed first based on safety and what the operation needs.
- Find and send repair shops, mobile mechanics, and tow trucks anywhere in the country.
- Check estimates, invoices, and recommended repairs to keep costs under control, and make sure DOT repairs get done so equipment stays compliant.
- Help drivers troubleshoot fault codes and warning lights so we know what's wrong before the truck gets to a shop.
- Keep repair records and maintenance history up to date, and build good working relationships with vendors and dealerships.

Service Manager

Dec 2024 – June 2026

Jensen Tire & Auto · Omaha, NE

- Ran the service department day to day and made sure repairs got done right and on time.
- Managed a team of 12 technicians, trained them, and helped newer techs work through tough repairs.
- Worked with parts vendors so we had the parts and supplies we needed when we needed them.

- Put inventory controls in place to cut waste and make more money on the parts we bought.
- Inspected finished repairs to make sure they met industry standards and what the customer expected.
- Worked with the sales team to find other services customers needed, and handled customer complaints that came up the chain.
- Hit monthly sales goals by managing labor costs, pricing, and recommending needed services.

Project Lead · OpenRoad Service Map
Oct 2026 – Present

Personal technology project · canman555.github.io/OpenRoad-ServiceMap

- Took a problem I deal with every day at work, finding a truck shop near a breakdown, and turned it into a free website anyone can use.
- Built it with an AI coding assistant over 100+ updates: I decided what it needed to do, checked every change, tested it on computer and phone, and put it online with GitHub Pages.
- Shows 3,600+ truck service locations from 12 companies, sorted by mile marker along the route, with tap-to-call phone numbers. The locations update on their own every week.
- Added a shared Post Board (beta) with a PIN where a fleet team can track trucks, trailers, work orders, and repair status in one place.

AI Trainer (Contract)
2025 – Present

- Worked on a contract project training AI models.

Diesel Mechanic Technician
May 2022 – Dec 2024

Truck Center Companies · Papillion, NE

- Read work orders, figured out the full repair, found any other damage, and gave customers cost-effective repair options.
- Planned each job using manuals, charts, and wiring diagrams, and diagnosed problems with Snap-on and factory software.
- Fixed electrical, hydraulic, and air brake systems, and hauled heavy equipment by semi and flatbed where it was needed.
- Earned DTNA factory certifications: Freightliner Cascadia, Freightliner M2, and Western Star 4700 / 47X / 57X / 49X.

Diesel Mechanic
Apr 2020 – May 2022

Liquid Trucking Companies · Plattsmouth, NE

- Kept about 200 semi trucks on their regular maintenance schedule and handled breakdown repairs.
- Did 160-step inspections to check each truck's condition before it went back out.

Diesel Mechanic, Mobile Repair
Nov 2019 – Apr 2020

MCCI · Gretna, NE

- Fixed trucks and trailers on job sites out of a service truck.

Diesel Mechanic / Heavy Equipment Operator
July 2017 – Nov 2019

Nebraska Department of Transportation · Elkhorn, NE

- Managed repairs on snowplow equipment for Omaha-area highways, working 12-on / 12-off on call through the winter.
- Managed the calibration of 120 truck-mounted salt spreaders and 15 tow-plow trailers in two months.

Customer Service Agent Lead
Aug 2015 – June 2017

GAT – United Airlines · Omaha, NE

- Led a team of customer service agents, trained new hires, and handled upset customers under pressure while following FAA rules.
- Got flights ready by arranging seats, load weight, and upgrades.

Also: Concrete Laborer, Noah Construction (2016–2017). Read blueprints, built forms, and worked with engineers on drainage.

04 EDUCATION

- **Associate, Diesel Technologies**
  Metropolitan Community College, Omaha, NE · 2018
- **High School Diploma**
  Papillion La Vista High School · 2017
- **Languages:** English and Spanish (fluent)

05 CERTIFICATIONS

- DTNA factory certified: Freightliner Cascadia, Freightliner M2, Western Star (Nov 2024)
- CDL Class A: tanker, doubles/triples, air brake, passenger
- EPA · Forklift · CPR
